Railroader Nation,

This morning a cell phone malfunctioned in the lobby before first period. This caused smoke and the fire alarm to be activated. The student body calmly exited the building and waited calmly while the fire department responded.

Once the lobby was cleared and deemed safe, the student body reentered the building and began the school day. I'm just keeping everyone in the loop and there is no cause for concern.

If you have any further questions please feel free to email me.

Thank you,

Ethan Burgess
