Dear Parents,

It has come to our attention that a small number of students from the district have been diagnosed with Pertussis (Whooping Cough). These students have sought medical intervention and have been properly treated and cleared by their doctor to return to school.

Pertussis is contagious through close contact with an infected child. Attached to this letter, please review the fact sheet that will help you be on the lookout for any symptoms of Pertussis. In the event that your child becomes symptomatic, it is important that you seek medical intervention.

Should you have any question please feel free to contact your personal health provider.

Sincerely,

Richard Trowbridge

Elementary Principal
